Summary

Full Stack Developer with experience in MERN stack (MongoDB, Express.js, React.js, Node.js) and PHP. Proficient in developing scalable web applications, REST APIs, real-time communication systems, and AI-powered chatbots. Skilled in OAuth 2.0 authentication, Redis, BullMQ, WebSockets, and cloud deployment (Render, Redis Cloud, AWS). Internship experience at Clavis Technologies (full-stack development) and Aaptatt Private Ltd. (static and dynamic website development in PHP). Strong background in responsive design, database management, and backend optimization.

Technologies

Fundamentals: Data Structures, Algorithms, Computer Networks, Operating System, Databases

Languages: JavaScript, TypeScript, PHP, Python, C++, Java

Tools: Next.js, React.js, Tailwind CSS, Bootstrap, Node.js, Express.js, REST APIs, Socket.IO, MongoDB, Cloudinary, Google Calendar API, Nodemailer, Redis, BullMQ, LLaMA 3.1 API, Multer, Git, GitHub, Render, Postman

Experience

Web Developer, Aaptatt Pvt. Ltd. – Gurgaon, Haryana Jun 2025 – Dec 2025

- Built and maintained static and dynamic websites using PHP, HTML, CSS, JavaScript, and Bootstrap, managing full deployment and maintenance while ensuring responsive design, cross-browser compatibility, and timely delivery to enhance the company's online presence.
- Completion Certificate
- Letter Of Recommendation

Full Stack Developer Intern, Clavis Technologies Pvt. Ltd. – Noida, UP Apr 2025 – Jun 2025

- Designed and developed StudoSphere under guidance of senior developers, a full-featured MERN stack web application, implementing real-time forums, collaborative ToDo lists, chatbot integration, and role-based access to enhance student and placement head experience.
- Completion Certificate
- Letter Of Recommendation

Projects

RideMate Jan 2026 – Feb 2026

- Technologies: MERN (MongoDB, Express, React, Node.js), Socket.IO, OpenStreetMap, Leaflet, JWT, Cloudinary.
- Built a real-time carpooling platform enabling users to post, discover, and match rides securely.
- Implemented real-time geolocation tracking and interactive map visualization.
- Built WebSocket-based chat for instant communication between drivers and riders.
- Designed identity masking and verification workflows to ensure privacy and safety.
- GitHub Repository

StudoSphere Apr 2025 – Jun 2025

- Technologies: MERN (MongoDB, Express, React, Node.js), Google Calendar API, Cloudinary, Multer
- Developed a platform under guidance of senior developers for students and placement heads with real-time forums, collaborative ToDo lists, chatbot assistance, role-based access, and faculty search.
- Implemented end-to-end features, including backend APIs, database design, frontend UI/UX, and deployment, ensuring a scalable and fully functional platform.
- StudoSphere
- GitHub Repository

Bulk Mailer System

Mar 2025

- Technologies: Node.js, Nodemailer, Redis, BullMQ
- Built a scalable email system sending 500+ emails per campaign for placement communications with scheduling and automated sending.
- Automated email workflows, reducing manual effort by 70% and improving timeliness of notifications.
- Bulk Mailer
- GitHub Repository

Education

VIT Bhopal University, BTech. in Computer Science and Engineering(spcl. in AI&ML)

Sehore, Madhya Pradesh

- CGPA: 8.45/10.0
